

I would like to express my dismay over this petition to the FCC.
If this petition is granted, it would give BellSouth, along
with many other large telephone companies the ability to Monopolize
DSL services, and thereby would put a hardship on many local
Internet Providers, who now, with the FCC's regulation of DSL prices,
are able to sell and stay competitive in the DSL Market.
No one business, no matter size, should have the ability to use a government
body, such as the FCC, to diminish (eliminate) their
competition.
